

Contents

Preface	v
Introduction	xvii

I Grind of Chance

1 Chance and Odds	3
1.1 What is Probability?	4
1.2 Probability and True Odds	6
1.3 House odds	7
1.4 Long odds	9
1.5 A brief history of the beginning of probability theory . . .	10
2 Mathematical Expectation	13
2.1 Mathematical Expectation: The bottom line in gambling . .	13
2.2 Mathematical Expectation of a lottery ticket and the concept of Expected Win	16
2.3 'Fair' Games	19
2.4 Mathematical Expectation vs. Expected Utility	20
2.5 Law of Large Numbers	21
2.6 The Fallacy called Law of Averages	22
2.7 Gambler's Fallacy	23
2.8 Monte Carlo Fallacy	24

II Ploys and Plays

3 Ploys by the lottery	29
3.1 Free Tickets	29
3.2 Optional Play	30
3.3 Inflated Jackpots	31

4	Plays A – Repeated Wagers	35
4.1	Doubling the bet	35
4.2	Doubling the frequency of wagers	36
4.3	Expected Win in repeated bets	37
4.4	Playing a long time	38
4.5	The Fallacy of Favourable Events	40
5	Popular Numbers and Beliefs	41
5.1	What are “popular” numbers?	41
5.2	Why people have favorite numbers?	42
5.3	The number 7	43
5.4	The number 3	45
5.5	Popular Beliefs	46
5.6	Why popular numbers are bad in lotto	51
5.7	Must you join a large group?	51
6	Patterns in Lotto Winning Numbers	53
6.1	Shapes on a lotto chart	53
6.2	Consecutive Numbers	54
6.3	Algebraic Patterns – The gap of a block	57
6.4	Algebraic Patterns – The width of a block	59
7	Draw History	63
7.1	How often should a specific number appear among the winning numbers?	64
7.2	Hot and Cold numbers	66
7.3	A bizarre phenomenon	68
7.4	Why histograms should only contain regular winning numbers	69
7.5	How many draws before every number is chosen at least once?	69
7.6	Why the figures on a lotto chart do not help	70
III Playing a single block in Lotto		
8	Binomial Coefficients and Computation of Chances in Lotto	73
8.1	What is a Lotto?	73
8.2	Two-field lotto	75
8.3	How do you enter a lotto draw?	76

8.4	Finding all the lotto blocks generated by a set of numbers	77
8.5	The number of blocks in a lotto	79
8.6	How do you win prizes in lotto?	81
8.7	How to calculate the chances in lotto	82
8.8	How the lotto prize amounts are determined	83
8.9	How the different lotto games differ	84
8.10	A Strange Phenomenon	86
9	Lotto Jackpot: A Grand Display of Cell Occupancy Problem	87
9.1	Jackpot rollover	87
9.2	Occurrence of a sole winner of jackpot	91
9.3	When is the chance highest for occurrence of a sole winner?	92
9.4	What are your chances of being a sole winner of the jackpot?	93
9.5	The expected number of blocks splitting a jackpot	96
9.6	Betting Volume	96
9.7	The Fractional Jackpot: A guardian of lotto's integrity	97
9.8	Is it better to Play when the jackpot is high?	98
9.9	Must you increase your wager because the jackpot is high?	100
IV Playing more than one block in Lotto		
10	Pair of blocks sharing some numbers	103
10.1	Intersecting blocks	103
10.2	Why intersection and overlap reduce your chances	105
10.3	Intersection, overlap, and Expected Win: The Fundamental Principle of Lotto	107
10.4	How do you handle the overlap problem?	108
10.5	Intersecting blocks in multi-field lotteries	109
11	Combination Play	111
11.1	What is Combination Play?	112
11.2	What happens when you play two identical blocks?	112
11.3	Two blocks with five numbers in common	114
11.4	Three blocks with five numbers in common	116
11.5	Five-Number Combination Play	118
11.6	Seven-number Combination Play	122
11.7	Eight-number Combination Play	125
11.8	Nine-number Combination Play	128

11.9	Combination Play and two-field lotto	132
12	Lotto Wheels	135
12.1	What is a Lotto Design or Wheel?	135
12.2	Minimal Lotto Designs	138
12.3	A catalogue of lotto wheels	140
12.4	The “Lottery Problem”	146
13	The Chances of a Wheel	147
13.1	The Spectrum of a Wheel	147
13.2	Computing the chances of a wheel	154
13.3	Repeated win: the compensator of reduced chance	156
14	Wheels for pick-5 lotto	159
14.1	A least-cost 3-if-3 wheel on 17 numbers	160
14.2	A least cost 3-if-3 wheel on 26 numbers in pick-5 lotto . . .	164
14.3	A least cost 4-if-4 wheel on 11 numbers in pick-5 lotto . . .	168
15	Wheels for pick-6 lotto	171
15.1	A least-cost 4-if-5 wheel on 10 numbers in pick-6 lotto . . .	171
15.2	A least-cost 5-if-6 wheel on 10 numbers in pick-6 lotto . . .	172
15.3	A least-cost 4-if-4 wheel on 11 numbers in pick-6 lotto . . .	173
15.4	A 4-if-5 wheel on 11 numbers in pick-6 lotto	174
15.5	A least-cost 4-if-6 wheel on 11 numbers in pick-6 lotto . . .	175
15.6	A 5-if-6 wheel on 11 numbers in pick-6 lotto	176
15.7	A 4-if-5 wheel on 12 numbers in pick-6 lotto	177
15.8	A least-cost 5-if-5 wheel on 12 numbers in pick-6 lotto . . .	178
15.9	A least-cost 4-if-6 wheel on 12 numbers in pick-6 lotto . . .	180
15.10	A 4-if-5 wheel on 13 numbers in pick-6 lotto	181
15.11	A least-cost 3-if-3 wheel on 22 numbers in pick-6 lotto . . .	182
15.12	How many tickets must you buy to guarantee a t-win in pick-6 lotto?	184
16	Wheels for pick-7 lotto	191
16.1	A least cost 5-if-5 wheel on 10 numbers in pick-7 lotto . . .	191
16.2	A least cost 6-if-6 wheel on 10 numbers in pick-7 lotto . . .	192
16.3	A least cost 5-if-5 wheel on 11 numbers in pick-7 lotto . . .	194
16.4	A least cost 6-if-6 wheel on 11 numbers in pick-7 lotto . . .	196
16.5	A least cost 4-if-4 wheel on 23 numbers in pick-7 lotto . . .	198

17 Lotto Systems with maximum chances	203
17.1 Maximum chances for pick-5 Lotto	203
17.2 Maximum chances for pick-6 Lotto	206
17.3 Maximum chances for pick-7 Lotto	210
Epilogue	213
Appendix	215
A Meaning and Consequences of the Law of Large Numbers . .	217
B Mathematical support for Chapter 3	225
C Mathematical support for Chapter 4	239
D Mathematical support for Chapter 6	245
E Mathematical support for Chapter 7	253
F Mathematical support for Chapter 8	259
G Mathematical support for Chapter 9	279
H Mathematical support for Chapter 10	289
I Mathematical support for Chapter 11	313
J Two properties of Lotto Designs	385
K Computing a Wheel's Chances using its Spectrum	389
L Computing a pick-5 wheel's chances using its Spectrum	405
M Spectra of Lotto Systems with maximum chances	415
References	423
Index	427
